

JOB OBJECTIVE

Targeting a career as a **DevOps Engineer** dedicated to enhancing the efficiency of application development processes and managing cloud infrastructure effectively to support organizational growth.

EDUCATION

2018 – 2022: B.Tech. (Computer Science) | Rajasthan Technical University

CERTIFICATIONS

- DevOps (Beginners → Advanced with Projects)
- AWS Cloud Practitioner
- Microsoft Azure Fundamentals
- Microsoft Azure Developer Associate
- Google Associate Cloud Engineer

CORE COMPETENCIES

- DevOps Best Practices
- Cloud Infrastructure Management
- Continuous Integration and Delivery
- Agile Methodologies
- System Performance Optimization
- Database Administration Strategies
- Automation Framework Development
- IT Service Management
- Cross-Functional Team Collaboration

TECHNICAL SKILLS

DevOps & CI/CD: Jenkins, Argo CD, GitOps, GitHub, GitLab, Terraform, Docker, Kubernetes
Cloud Platforms: AWS (Lambda, EC2, DynamoDB, CloudWatch), Azure, GCP
Programming & Scripting: Java, Python, JavaScript, Bash
Databases: MySQL, SQLite
Monitoring & Tools: New Relic, CloudWatch, Jira, Git
Other: Linux, S3, Consul, Vault

PERSONAL DETAILS

Date of Birth: 29th November 1999
Languages Known: English & Hindi
Address: Pune, India

PROFILE SUMMARY

DevOps Engineer with **over 3.7 years** of hands-on experience in designing, implementing, and optimizing CI/CD pipelines and cloud-native deployments using Kubernetes, Argo CD, and AWS services such as **Lambda, EC2, and DynamoDB**. Skilled in automation, Infrastructure as Code (Terraform), and monitoring tools including **New Relic and CloudWatch**, with a strong focus on enhancing operational workflow and ensuring scalable, reliable application delivery. Proven track record of leading initiatives to transition legacy systems to cloud-based architectures, resulting in significant cost savings and performance improvements. Skilled at optimizing databases, scripting automation, and driving cross-functional collaboration to foster continuous improvement in DevOps practices. Committed to aligning technical solutions with business objectives through innovative problem-solving, improving deployment frequency, reducing downtime, and maintaining compliance with cloud security protocols. Continuously pursuing professional development to stay ahead in the evolving DevOps landscape.

WORK EXPERIENCE

Senior Software Engineer | Capgemini | Pune

Oct 2024 – Present

- Designed and Managed CI/CD pipelines using Jenkins, Argo CD, and GitOps methodologies to enhance deployment efficiency and reliability.
- Streamlining infrastructure management processes through automation scripting, minimizing manual intervention and reducing operational overhead.
- Administering Kubernetes deployments to ensure high availability and performance of cloud-native applications, while implementing best practices for container orchestration.
- Transitioning CI/CD workflow from traditional Jenkins setups to modern Argo CD frameworks, thereby improving deployment speed and reducing errors.
- Designing and deploying AWS solutions, including Lambda, EC2, and DynamoDB, while integrating comprehensive monitoring solutions via New Relic and CloudWatch for proactive performance management.
- Enhancing database performance by optimizing MySQL queries and developing automation scripts that facilitate routine maintenance tasks.

Highlights:

- Leveraged GitHub and Terraform for effective version control and Infrastructure as Code (IaC) practices, ensuring consistent and repeatable deployments.
- Successfully reduced deployment times through the implementation of automated CI/CD workflow, leading to increased productivity & faster time-to-market for applications.
- Played a pivotal role in enhancing system reliability by migrating critical applications to a cloud-native architecture, resulting in improvement in uptime.

Software Engineer | Capgemini | Pune

Dec 2022 – Oct 2024

- Engaged in comprehensive training on DevOps engineering principles and Java full stack development, focusing on technologies such as React, Microservices, and MySQL.
- Developed and maintained CI/CD pipelines for GCP deployments, ensured robust testing and integration processes that align with industry standards.
- Assisted in scaling AWS infrastructure, managed essential tasks such as password updates and GitHub repository management to ensure seamless operations.
- Contributed to the development of Java full stack applications, employed React and Microservices architecture to deliver high-quality software solutions.
- Actively resolved Jira tickets, collaborated with cross-functional teams to address issues and enhance overall DevOps processes.
